PROCEEDINGS OF BOARD OF SUPERVISORS

(Continued from Page Two)

interest on said bonds and to pay annually a proportion of the principal of said bonds equal to a sum produced by taking the whole amount of said bonds of this issue outstanding and dividing it by the number of years said bonds have to run; and all money so levied shall be when collected paid into the County Treasury and placed to the credit of the building fund of said school district, and used for the payment of the principal and interest on said bonds and for no other purpose.

It is further ordered that the said bonds be advertised for sale for three weeks in the Mining Journal, a weekly newspaper of general circulation, and published in the Town of Clifton, Greenlee County, Arizona, and the Clerk of this Board is hereby directed to prepare a notice of advertisement calling for sealed bids for the purchase of said bonds until Monday, June 5th, 1916 at the hour of ten o'clock A. M., said bids to be deposited with the Clerk of this Board on or before ten o'clock A. M., Monday, June 5th, 1916.

Upon motion by W. T. Witt, seconded by W. W. Dutton and carried unanimously, the Clerk is hereby authorized to advertise for bids for the construction of the extension of the Metcalf Road according to plans and specifications on file in the office of the Board of Supervisors.

At 4:15 P. M. upon motion the Board adjourns until Wednesday, May 17, 1916.

Clifton, Arizona, May 17, 1916.
Office of the Board of Supervisors, Clifton, Greenlee County, State of Arizona.

The Board of Supervisors met this day in continued regular session with all Members and the Clerk present.

Meeting called to order by Chairman Witt at 4 P. M.

Upon motion by W. T. Witt, seconded by S. F. Awalt and carried unanimously, J. G. Cash, Sheriff, is hereby authorized to appoint six extra deputy sheriffs for two weeks at the rate of \$125.00 per month.

At 4:30 P. M. upon motion the Board adjourns until Wednesday, May 24th, 1916.

Clifton, Arizona, May 24, 1916.
Office of the Board of Supervisors, Clifton, Greenlee County, State of Arizona.

The Board of Supervisors met this day in continued regular session with all Members and the Clerk present.

Meeting called to order by Chairman Witt at 9:15 a. m.

Upon motion by W. W. Dutton, seconded by S. F. Awalt and carried unanimously, the Clerk is hereby instructed to request the Board of Control that prison labor be employed in Greenlee County on the Clifton-Solonville Highway for the fiscal year of July 1, 1916 to June 30, 1917.

At 10:30 A. M. upon motion the Board adjourns.

Attest:
A. L. TERRY, Clerk.

SUFFRAGISTS TO LEAD ANIMALS

CHICAGO, May 20.—Animal mas-
cots, it was announced today, will form a unique part of the Woman's Suffrage parade here on June 7th. Twelve states have already sent word to the parade headquarters that their delegations would be accompanied by animals.

California suffragists started the move by procuring a tame grizzly bear. Other states followed, Arizona adopting a lizard.

Is your cigarette sensible?

All we say is this—make sure your daily cigarette is sensible, whether it is Fatima or some other one.

Is it cool and friendly to your throat and tongue? Does it leave you feeling O.K. after a long day of smoking?

Fatima certainly makes good on these two points.

The only question is—will they just suit your individual taste? They may or they may not. But it seems reasonable that they should, for they outsell any other cigarette costing over 5c.

So you ought to try them. Do that today.

THE METAL MARKET

Copper continues very strong. Lake and electrolytic have been sold this week for delivery during the last quarter of this year at 29 1-4 cents a pound. As to the price of copper for immediate delivery, reports differ, the quotations running all the way from 30 to 31 cents, with 29 1-2 to 30 cents quoted for July. Rumors persist that some of the small consumers have been reselling for cash odd lots of copper which they purchased months ago at lower prices; but it is impossible to obtain definite confirmation of these reports. That the market is practically bare of supplies seems to find conclusive proof in the fact that considerable purchases are being made for delivery up to the end of this year.

The export movement continues rather slow; but apparently this is due largely to congestion in shipping, the recent rapid advance in the price of cash copper in London indicating the existence of an acute scarcity. Electrolytic is now selling there at 158 pounds per long ton, which is equivalent to 34 cents per pound at the prevailing rate of exchange.

Notwithstanding that the volume of production is very large and still increasing slightly, there is nothing in the situation upon which to base the belief that copper will decline in price so long as the European war continues. As to what may happen after peace is restored one person's guess is as good as another's. It can be stated positively, however, that the domestic consumption of copper, in building, electrification and industrial lines generally, is growing steadily, the high price of the metal apparently exerting no influence to restrict its use.

Regardless of how fast or how slow the production of copper has increased in the past the price always has been relatively high when world-wide business conditions were prosperous. For illustration, in 1895 the world's copper output was less than 750,000,000 pounds and the average price that year was only 10.70 cents a pound. It was a period of world-wide industrial depression. In 1913, however, when the world's output was almost three times that of 1895, copper sold at an average of 15.70 cents a pound.

In 1897 and 1898, when copper was selling between 11 and 12 cents, the leading men in the producing trade used to tell me that the future outlook for this metal was very bright, because, as they expressed it, "no new sources of copper supply were being discovered." They thought the world's production, then about 1,000,000,000 pounds a year, had reached its approximate limit, and they predicted, guardedly, that copper would again sell as high as 14 or 15 cents a pound.

If these old timers could have been convinced that the world's production for the year 1916 would be 2,000,000,000 pounds they would have sold their mining shares and engaged in some other business. During these

18 years the total production of copper has increased 170 per cent and with it has come a 170 per cent advance in the market price of the metal.

With these facts so vividly in mind, I am often amused by the continually repeated arguments that the increasing production of copper will force the price down to 12 cents in the very near future. Of course the price is regulated by demand and supply, but in the case of copper the demand always has and probably always will increase more rapidly than the supply. Copper has won its own way into hundreds of new fields of use. If the producing companies were to advertise copper until the public became educated as to its use value, they undoubtedly could sell their entire output for all time at 20 to 25 cents a pound.

50c COPPER PROBABLE

Copper is still going up and this summer and the coming summer will see it undoubtedly in the thirties, according to a report from the Arizona State Bureau of Mines. The price of advanced deliveries show both increased demands and higher prices. The market is in such a position that it can be held in check by purchasers and the consumers have such enormous volumes of urgent orders on their books that they will pay any price asked for copper rather than retard their activities. Several hundred million pounds of copper have been sold that have not been mined.

This condition means much to Arizona, for Arizona is the greatest producer of copper, and will receive the greatest percentage of the increased prices and increasing demand. The condition means still more, for the policy of the Arizona producers has been to share profits, by the application of the sliding scale of wages, and hence with increased prices received for the product, more is distributed to the working man of the state.

While Arizona is the most prosperous of all states, it is due to have an increased prosperity. Dr. L. D. Ricketts has been quoted as saying that copper will reach 50 cents. Just think in dollars and cents what this means to Arizona.

BRIDGES NEARLY READY

Work in repairing the approaches to the Gila and San Carlos bridges will soon be ready for traffic, probably by the end of the week.

**ODD FELLOWS IN SESSION**

PHOENIX, May 24.—With about 100 per cent of members in attendance, the grand lodge I. O. O. F. convened in the hall of the order in Phoenix this morning and spent the forenoon session in organizing.

Considerable business will be brought before the lodge during its three days' meetings and a very successful session is expected to result. Officers of the lodge are:

L. E. Rice, grand master, Morenci; J. G. Belt, deputy grand master, Phoenix; J. D. Baker, grand warden, Yuma; George A. Mintz, grand secretary, Phoenix; E. A. Watkins, grand treasurer, Bisbee; P. C. Anderson, grand representative, Globe; J. M. W. Moore, grand representative, Prescott; N. A. Morford, grand treasurer, Phoenix; A. W. Smith, grand trustee, Tempe; L. V. Russell, grand marshal, Tucson; Axel Erickson, grand conductor, Kingman; V. R. Norris, grand guardian, Phoenix; George Reitzer, grand herald, Clifton; Ralph A. Nye, grand chaplain, Buckeye.

Election of grand officers for the ensuing term will be held tomorrow forenoon.

The eighteenth general assembly of the Rebekahs is also in session today and will continue for three days. The officers of the general assembly are:

Marien Slack, president, Globe; Jennie Moore, vice president, Morenci; Emma Frankel, warden, Yuma; Elizabeth Tappin, treasurer, Clifton; Nellie Norris, trustee, Mesa; Margaret Francis, trustee, Tucson; Cora Suder, marshal, Prescott; Emma Kirtland, conductor, Safford; Allis Dickerman, inside guardian, Douglas; Nettie Tonkins, outside guard, Bisbee.

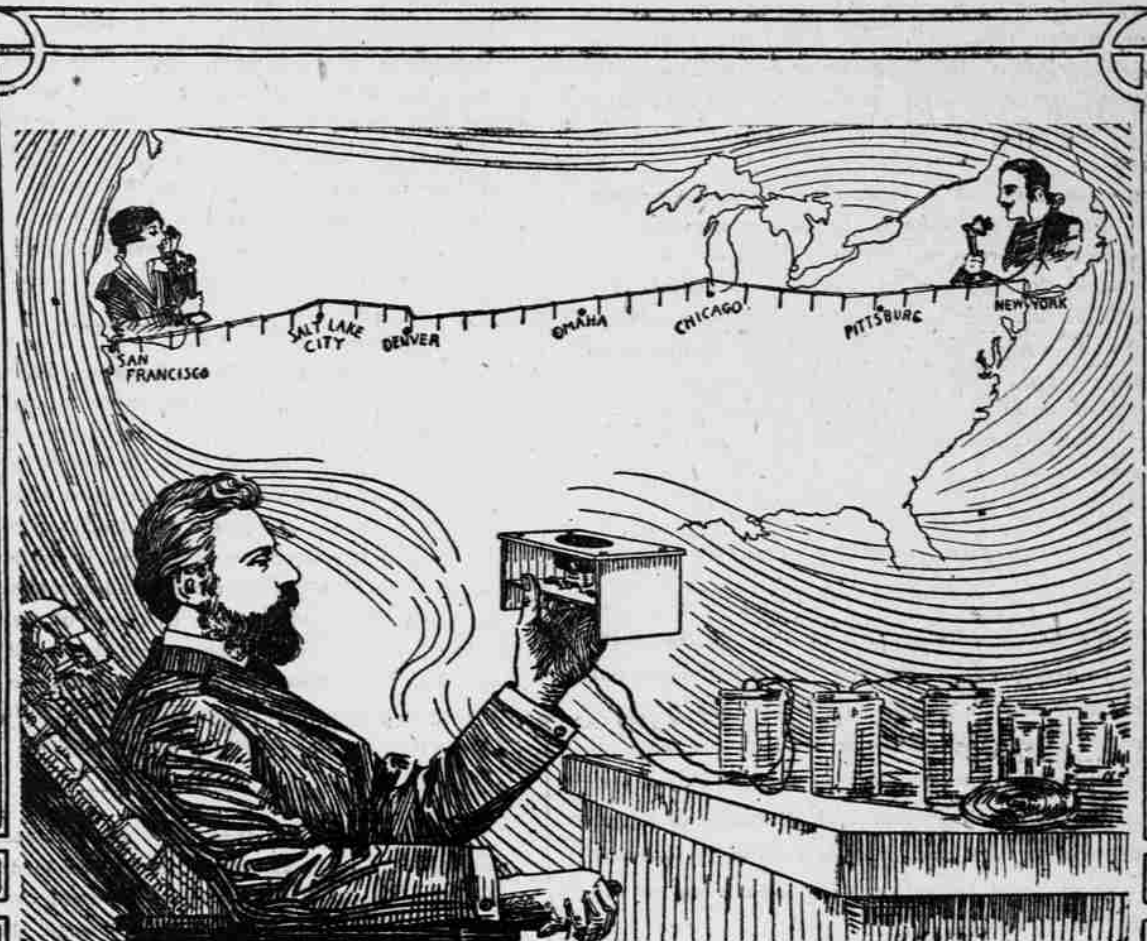

LABORITES READY WITH NEW CROP OF BILLS

PHOENIX, May 19.—Four petitions all signed with nearly one thousand names, were filed with Secretary of State Sidney Osborn the first of the week, seeking to initiate two new statutes and two amendments to the state constitution.

The most important of the four is an amendment to the constitution which would abolish the state senate. To this petition are signed 981 names. The other constitutional amendment would amend the compulsory compensation act, and carried 1061 names.

The two would-be statutes would create a department of labor and a state architect and superintendent of buildings. The labor petition is signed with 1065 names, and the architect measure has 987 signatures.

All four of the measures are fostered by the State Federation of Labor.

**Telephone Standards**

Forty years ago Alexander Graham Bell succeeded in transmitting the sound of the human voice over a wire; and while men scoffed at the invention and laughed the inventor to scorn Bell's imagination even then pictured the telephone in universal use.

His was the master mind, that penetrated the future and visualized an ideal—One System, One Policy, Universal Service.

Since then, time has developed certain standards—standards of plant construction, standards of equipment, standards of service efficiency.

Standards of our duty to the public have existed from the beginning of time; for they are founded on principles of equal justice and fair dealing. This means that our service must be as nearly perfect as human skill and ingenuity can make it, and that our rates must be fair, equitable, and as low as a fair return upon investment will permit.

It means courteous consideration of the public's needs, and solving the problems growing out of such needs in the light of the best engineering and other expert skill which the art of telephony has developed.

Such a policy commends itself to public favor, public respect and public confidence, without which no public utility can long exist.
